# Vaultline Partner Trust Report

**Reporting period:** [YYYY-MM-DD to YYYY-MM-DD]
**Provider:** [Provider name]
**Generated from:** aggregate, privacy-safe telemetry only

## Executive summary

Vaultline operates a consent-first integration workspace. This report contains aggregate metrics only; it never includes plaintext credentials, individual secret values, or user-identifying payloads.

## Trust telemetry

| Metric | Value | Method |
|---|---|---|
| Consent-based keys issued | [count] | Count of approved workflow records |
| Validation pass rate | [%] | Successful validation / total validation attempts |
| Median revocation compliance time | [duration] | Aggregate audit timestamps |
| Plaintext-exposure attestations | 0 | Redaction tests and audit review |
| Active signed agreement | [yes/no] | Partner agreement gate |

## Controls

- Official OAuth/API or manual entry only.
- No dashboard scraping or one-time secret extraction.
- MFA, CAPTCHA, identity, terms, and payment verification remain human-controlled.
- Partner marketplace remains inactive unless the signed-agreement hard gate is satisfied.
- Payment functionality is mock-only by default.
